

**INNOVATIVE
TECHNOLOGY FOR
ANY FLEET.
ANY TRUCK.
ANY VOCATION.**

VX MAKES ANY BODY SMARTER.

THE VX EDGE

ALL-IN-ONE

One back-end system.

One front-end interface.

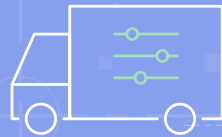

VX integrates essential features into a single, streamlined system, simplifying ongoing maintenance and upfits. In addition to the reduced system complexity, VX also provides drivers with everything they need at their fingertips by consolidating critical information and controls into one interface. This simplified front-end design helps drivers stay focused, minimizing distractions and enhancing safety on the road.

WORKS WITH ANY TRUCK

Universal for your entire fleet.

Regardless of the type of truck or equipment in your fleet, VX is a versatile solution designed to integrate seamlessly with them all. Just as JBPCO's business units offer custom body solutions for your fleet, VX provides the flexibility to adapt and scale as your fleet grows.

TWO-WAY COMMUNICATION

Fully Connected.

VX establishes a seamless two-way communication channel delivering important information to and from the vehicle. This ensures that both the driver/operator and the fleet manager have access to clear, consistent, and up-to-date information, keeping everyone aligned and on the same page.

THE FUTURE OF SMARTER FLEETS

IS HERE.

Meet VX, the only innovative technology that unifies existing and add-on features across any truck body and cab together into one digital system, providing driver/operators with a higher level of safety and productivity, and fleet managers with data insights for optimal operations and decision making. Your fleet just got smarter.

VX PACKAGES

VX is modular, so you can add packages whenever
you need—now or down the road.

VX AWARE

Boost visibility and keep things safe

Interactive Exterior View
Full 360° view + eagle eye

Interactive Interior View
Cargo or cab view

Digital e-Mirror*
Rear view, digital mirror

Rear Park Assist
Enhanced rear visibility

Obstacle Proximity Alarm
Backup warning

Functional Feature Status
& Control**
*Status and control of lighting,
locks, and equipment*

VX SECURE

Keep track of your tools and assets

Cargo Breach Alert**
Text alerts to mobile device

Asset Tracking**
Tool tracking

Verified User Entry**
*Visual & audio notification
for unauthorized access*

*Available add-on **Patents pending

THE POWER

OF VX

VX is built with first-hand field input combined with EAVX's engineering vision for smart vehicle operations and management.

At the core of VX is one seamlessly integrated backend system that combines the inputs from lighting, locks, cameras, secured tools, preventative maintenance, and more into a single interface point, providing drivers with the notifications and control they need at their fingertips to be safe, stay on track, and keep workflow running at its best.

It doesn't stop there. Fleet managers and vehicles have the ability to communicate real-time information between each other. All together combining capabilities and efficiencies within the body upfit, to reduce operational costs and increase uptime.
